

Belarus

Human Capital Index 2020

This brief provides an update to the Human Capital Index (HCI). First launched in 2018, the HCI measures the amount of human capital that a child born today can expect to attain by age 18. It conveys the productivity of the next generation of workers compared to a benchmark of complete education and full health. Worldwide a child born in 2020 can expect, on average, to be 56 percent as productive as she could be when she grows up. All data represent the status of countries pre-COVID-19.

THE HUMAN CAPITAL INDEX

Human Capital Index. A child born in Belarus today will be **70 percent** as productive when she grows up as she could be if she enjoyed complete education and full health. This is higher than the average for Europe & Central Asia region and Upper middle income countries.

- **Probability of Survival to Age 5.** 100 out of 100 children born in Belarus survive to age 5.
- **Expected Years of School.** In Belarus, a child who starts school at age 4 can expect to complete **13.8 years** of school by her 18th birthday.
- **Harmonized Test Scores.** Students in Belarus score **488** on a scale where 625 represents advanced attainment and 300 represents minimum attainment.
- **Learning-adjusted Years of School.** Factoring in what children actually learn, expected years of school is only **10.8 years**.
- **Adult Survival Rate.** Across Belarus, **85 percent** of 15-year olds will survive until age 60. This statistic is a proxy for the range of health risks that a child born today would experience as an adult under current conditions.
- **Healthy Growth (Not Stunted Rate).** Data on stunting are not available for Belarus.

DIFFERENCES IN HCI ACROSS GENDER AND SOCIO-ECONOMIC GROUPS

In Belarus, the HCI for girls is higher than for boys. Table 1 shows gender disaggregation for each of the HCI components.

In Belarus, there are not sufficient data to disaggregate HCI by socio-economic groups.

Table 1. HCI by Gender and Socio-economic Group

Component	Boys	Girls	Overall
HCI	0.67	0.73	0.70
Survival to Age 5	1.00	1.00	1.00
Expected Years of School	13.8	13.8	13.8
Harmonized Test Scores	486	490	488
Learning-adjusted Years of School	10.8	10.8	10.8
Adult Survival Rate	0.78	0.92	0.85
Not Stunted Rate	-	-	-
HCI Ratio (richest / poorest 20 percent)	-	-	-
