

# Dominica

## Human Capital Index 2020

This brief provides an update to the Human Capital Index (HCI). First launched in 2018, the HCI measures the amount of human capital that a child born today can expect to attain by age 18. It conveys the productivity of the next generation of workers compared to a benchmark of complete education and full health. Worldwide a child born in 2020 can expect, on average, to be 56 percent as productive as she could be when she grows up. All data represent the status of countries pre-COVID-19.

### THE HUMAN CAPITAL INDEX

**Human Capital Index.** A child born in Dominica today will be **54 percent** as productive when she grows up as she could be if she enjoyed complete education and full health. This is lower than the average for Latin America & Caribbean region and Upper middle income countries.

- **Probability of Survival to Age 5.** 96 out of 100 children born in Dominica survive to age 5.
- **Expected Years of School.** In Dominica, a child who starts school at age 4 can expect to complete **12.4 years** of school by her 18th birthday.
- **Harmonized Test Scores.** Students in Dominica score **404** on a scale where 625 represents advanced attainment and 300 represents minimum attainment.
- **Learning-adjusted Years of School.** Factoring in what children actually learn, expected years of school is only **8 years**.
- **Adult Survival Rate.** Across Dominica, **86 percent** of 15-year olds will survive until age 60. This statistic is a proxy for the range of health risks that a child born today would experience as an adult under current conditions.
- **Healthy Growth (Not Stunted Rate).** Data on stunting are not available for Dominica.

### DIFFERENCES IN HCI ACROSS GENDER AND SOCIO-ECONOMIC GROUPS

In Dominica, the HCI for girls is higher than for boys. Table 1 shows gender disaggregation for each of the HCI components.

In Dominica, there are not sufficient data to disaggregate HCI by socio-economic groups.

**Table 1. HCI by Gender and Socio-economic Group**

Component	Boys	Girls	Overall
HCI	0.52	0.58	0.54
Survival to Age 5	0.96	0.97	0.96
Expected Years of School	12.2	12.6	12.4
Harmonized Test Scores	393	416	404
Learning-adjusted Years of School	7.7	8.4	8.0
Adult Survival Rate	0.83	0.90	0.86
Not Stunted Rate	-	-	-
HCI Ratio (richest / poorest 20 percent)	-	-	-
