## Human Capital Index 2020

This brief provides an update to the Human Capital Index (HCI). First launched in 2018, the HCI measures the amount of human capital that a child born today can expect to attain by age 18. It conveys the productivity of the next generation of workers compared to a benchmark of complete education and full health. Worldwide a child born in 2020 can expect, on average, to be 56 percent as productive as she could be when she grows up. All data represent the status of countries pre-COVID-19.

### THE HUMAN CAPITAL INDEX

**Human Capital Index.** A child born in the Seychelles today will be **63 percent** as productive when she grows up as she could be if she enjoyed complete education and full health. This is higher than the average for Sub-Saharan Africa region but lower than the average for High income countries. Between 2010 and 2020, the HCI value for the Seychelles increased from 0.57 to 0.63. Figure 1 shows how the HCI and each of the components evolved over time.

- **Probability of Survival to Age 5.** 99 out of 100 children born in the Seychelles survive to age 5.
- **Expected Years of School.** In the Seychelles, a child who starts school at age 4 can expect to complete **13.1 years** of school by her 18th birthday.
- **Harmonized Test Scores.** Students in the Seychelles score **463** on a scale where 625 represents advanced attainment and 300 represents minimum attainment.
- **Learning-adjusted Years of School.** Factoring in what children actually learn, expected years of school is only **9.7 years**.
- **Adult Survival Rate.** Across the Seychelles, **85 percent** of 15-year olds will survive until age 60. This statistic is a proxy for the range of health risks that a child born today would experience as an adult under current conditions.
- **Healthy Growth (Not Stunted Rate).** Data on stunting are not available for the Seychelles.

### DIFFERENCES IN HCI ACROSS GENDER AND SOCIO-ECONOMIC GROUPS

In the Seychelles, lack of data prevents comparison of HCI by gender. Table 1 shows gender disaggregation for each of the HCI components, where available.

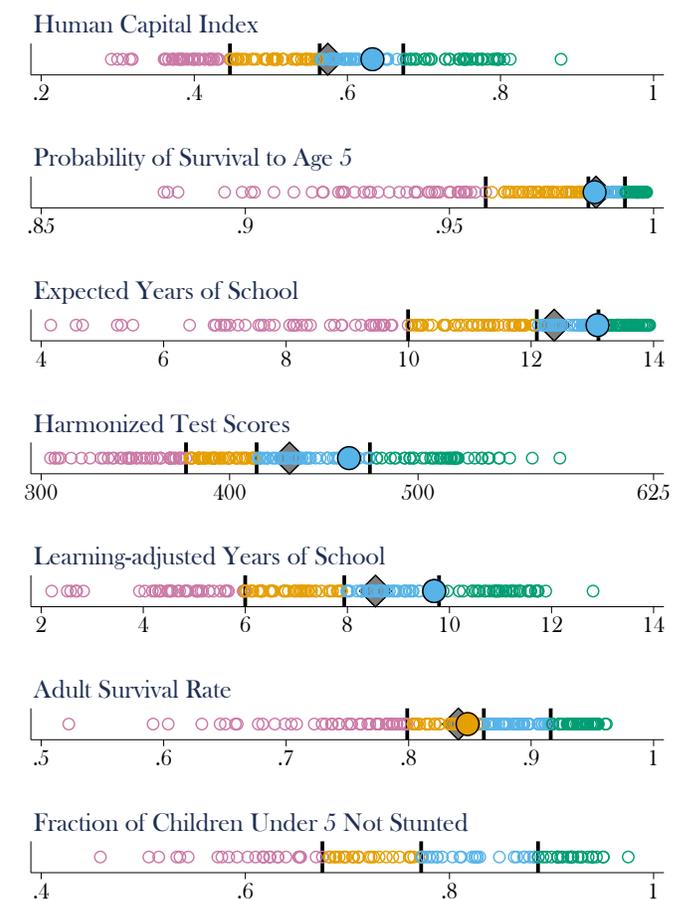

In the Seychelles, there are not sufficient data to disaggregate HCI by socio-economic groups.

**Table 1. HCI by Gender and Socio-economic Group**

Component	Boys	Girls	Overall
HCI	-	-	0.63
Survival to Age 5	0.98	0.99	0.99
Expected Years of School	12.7	13.4	13.1
Harmonized Test Scores	-	-	463
Learning-adjusted Years of School	-	-	9.7
Adult Survival Rate	0.80	0.90	0.85
Not Stunted Rate	-	-	-
HCI Ratio (richest / poorest 20 percent)	-	-	-

**Figure 1. HCI and Components**

Note:

- Large circle represents Seychelles in 2020
- Diamond represents Seychelles in 2010
- Small circles represent other countries
- Lines and color of circles indicate quartiles of the distribution

The outlook for the next generation has been improving in most African countries. Efforts are being made to protect these human capital gains against setbacks such as COVID-19 and accelerate progress. The WBG Africa Human Capital Plan identifies game-changers for human capital, including women's empowerment to accelerate the demographic transition, a focus on fragile settings, increased use of technologies, and smarter investments at scale.

### DOMESTIC RESOURCE UTILIZATION AND MOBILIZATION

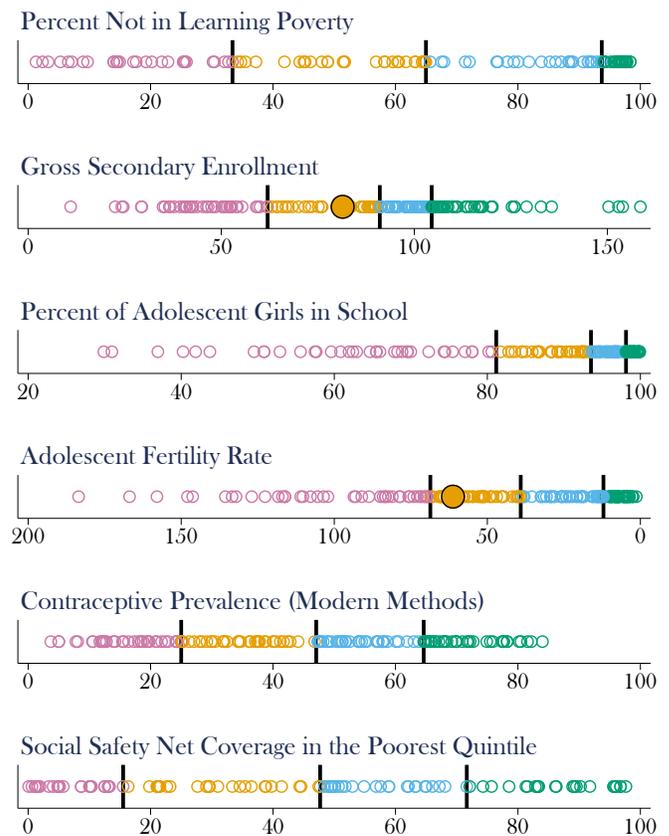

- **Health Spending.** The Seychelles spends **3.7 percent** (2017) of its GDP in public spending on health. This is higher than the average for its region (2.4%) but lower than the average for its income group (5.3%). **3 percent** (2013) of the population incurs catastrophic health expenditure measured as out-of-pocket spending exceeding 10% of household consumption or income.
- **Education Spending.** The Seychelles spends **4.4 percent** (2016) of its GDP in government education spending. This is higher than the average for its region (4.0%) but lower than the average for its income group (4.5%).
- **Social Assistance Spending.** The Seychelles spends **2.7 percent** (2015) of its GDP on social assistance. This is higher than both the regional average (1.5%) and the average for its income group (1.7%).
- **Government Revenue.** General government revenue in the Seychelles is **37.6 percent** (2018) of GDP. This is higher than both the regional average (20.6%) and the average for its income group (37.3%).

### COMPLEMENTARY INDICATORS

- **Learning Poverty.** In the Seychelles, data on learning poverty are not available. In its region, 80 percent of 10-year-olds cannot read and understand a simple text by the end of primary school. The corresponding value for its income group is 14 percent.
- **Gross Secondary Enrollment.** In the Seychelles, the gross enrollment ratio in secondary education is **81 percent** (2018). This is higher than the average for its region (50%) but lower than the average for its income group (107%).
- **Adolescent Girls Out Of School.** In the Seychelles, data on percentage of adolescent girls out of school are not available. In its region 33 percent of adolescent girls is out of school. The corresponding value for its income group is 5 percent.
- **Adolescent Fertility Rate.** In the Seychelles, there are **61 births** (2018) per 1,000 women ages 15-19. This is lower than the Africa Human Capital Target for 2023 (83).
- **Contraceptive Prevalence.** In the Seychelles, data on contraceptive prevalence rate are not available. In its region, 28 percent (.) of women ages 15-49 use modern contraceptive methods, and in its income group, 59 percent use it.
- **Maternal Mortality Ratio.** In the Seychelles, for every 100,000 live births **53 women** (2017) die from pregnancy-related causes. This is lower than the average for its region (445) but higher than the average for its income group (14).
- **Universal Health Coverage (UHC) Index.** The index, ranging from 0 to 100, measures coverage of essential health services based on tracer interventions. In the Seychelles, the UHC Index score is **71** (2017). This is higher than the average for its region (46) but lower than the average for its income group (79).
- **Social Safety Net Coverage.** In the Seychelles, data on social safety net coverage of the poorest quintile are not available. The Africa Human Capital target for 2023 is 30 percent.
- **Electricity.** In the Seychelles, **100 percent** (2018) of the population has access to electricity. This is higher than the average for its region (50%) but similar to the average for its income group (100%).

- **Internet Connectivity.** In the Seychelles, **59 percent** (2017) of the population uses the internet. This is higher than the average for its region (22%) but lower than the average for its income group (85%).
- **Open Defecation.** In the Seychelles, **0 percent** (2017) of the population practices open defecation. This is lower than the Africa Human Capital Target for 2023 (15%).
